

Auto Focus Asia Editorial Calendar

Editorial Sections	April 2008	September 2008	December 2008
Management	Challenges for Automakers and Suppliers	Global Manufacturing	Russian Automotive Industry
	Tata Nano	M&A in the Automotive industry	Asian Automotive Industry Opportunities, Challenges and Future
			Commercialising Innovation – OEMs and Suppliers joint interest
Information Technology	Operational Execution System	3D Modeling Software	RFID in the Auto Industry
		Web-based technology for Intelligent equipment sharing	Implications of microcontroller software and tooling on safety-critical automotive systems
		AUTOSAR Development Methods and tools	
Materials	Design for Recycling	Car Recycling and Environmental Challenges	Material and process developments in underhood applications
		Plastics in Automotive Interiors	Engineering plastics in automotive powertrain applications
		Innovation in Manufacturing Plastic Parts	
Design and Testing	Driver-centred Design	Green Design	Design for Demand and Safety
	Automotive Design Process	Rethinking Automotive Design for Product Realisation	Vehicle Testing
	Improving Automotive Design Process	Human Machine Interface Considerations in design	Modeling and Simulation for Manufacturing improvements
Engine and Chassis	Diesel Engines	Light vehicle powertrains	Future fuels and future engine technologies
	Renewable Methane	Energy Management – Impact of Chassis systems on CO ₂	Powertrain optimization for flex-fuel engines
	Powertrain Diesel vs Hybrids	Biofuels and the automotive industry	Advances in Engine Downsizing technologies
	Electric Drive Vehicles		
Electrical and Electronics	The Future Car Key	Automotive Telematics Emerging technologies	Advanced Driver Assistance Systems
	Electricity Fuel	Two-way Data Connectivity	Electronic Systems for Inspiring Automobiles
	Dynamic Traffic Services		Connected Vehicles in a Changing World

	Driver Assist Systems		
Engineering Services	ESO – The India Story	An Outsourcer’s perspective	Changing Engineering Requirements
Components and Ancillaries	Focus on Indian suppliers	Light weight composites for automotive applications	Note on Emerging Markets in Asia (ASEAN countries)
Production and Manufacturing	Capturing CO ₂	EU CO ₂ Outlook Meeting the challenge	Digital Manufacturing
	Nanotechnology for Automotive Applications	Air could be the answer	Race car manufacturing
